

Cast Iron Bench

Thank you for your purchase of this bench of outdoor furniture and accessories. Every step has been taken to make this the best looking longest lasting bench in the market today.

Note: While the bench can be assembled by one person, a second set of hands will help considerably.

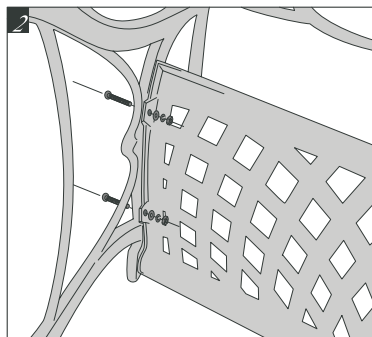

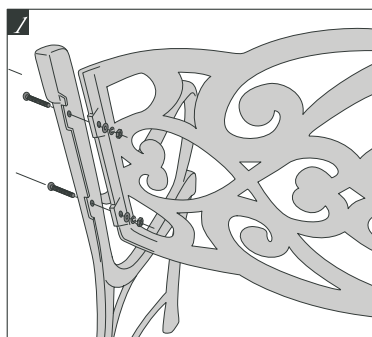

Parts list

A. Bench back	1
B. Bench seat	1
C. Side frames	2
D. Side frame brace	1

Hardware

Bolts	8
Flat washers	8
Lock washers	8
Lock nuts	8
Side frame brace bolts	2

Assembly

1. Have an assistant hold the bench back (A) in place and line up the slots with the slots in one of the side frame units (C). Insert a bolt through each hole from the outside of the side frame and secure **loosely** with a flat washer, then a lock washer and finally a lock nut. Repeat on the opposite end.

Warning: If this bench is left outside in the rain it WILL rust

2. Tilt the assembled side frame and seat back forward to rest face down on the floor. Have an assistant position the bench seat (B) to align with the seat slots on the side frame. Insert a bolt through each hole from the outside of the side frame and secure **loosely** with a flat washer, then a lock washer and finally a lock nut. Repeat on the opposite end.

Stand the entire unit back up and make certain the all parts are aligned and sit square. The final step is to tighten all 8 nuts. **Do not sit on the unit until all hardware has been tightened.**

Warning! Do not EVER move this bench without picking up BOTH ends. Dragging or pushing the bench across any surface will result in "chattering" which can fracture cast iron and cause immediate or future breakage.
